DEPARTMENT OF AGRICULTURE BUREAU OF AGRICULTURAL ECONOMICS

CHIEF

To conduct research on the economics of production, distribution, land utilization, and conservation in their broadest aspects; and in cooperation with interested bureaus and with state and local agencies to formulate coordinated, department-wide plans and programs of action in these fields.

STAFF SERVICES

ECONOMIC LIBRARY

To serve as economic library for Dept., circulate publications, compile bibliographies, literature, and provide legislative and economic reference service.

ACCOUNTS

To develop and account for the Bureau's fiscal administration and coordinate accounting and general Accounting Office requirements.

BUDGET

To prepare Bureau budget and later-bureau agreements regarding transfer of funds for Bureau's various activities; to formulate and allotments; to maintain uniform project system.

PERSONNEL

To develop & administer coordinated divisional, Bureau & Departmental personnel programs; to handle personnel classification, personnel selection, appointment, placement, promotion, relations and related functions.

GENERAL SERVICE

To provide general services to facilitate operations such as property records, processing, contracts, communications, records, stenographic & typing service.

PROGRAM RELATIONS

To assist the Chief in the development, coordination, and integration of program relations work for the Bureau & to act as permanent member of the permanent Bureau coordinating committee.

MARKET PLANNING

To assist the Chief in the development, coordination, and integration of market planning work for the Bureau & to act as vice-chairman of the permanent Bureau coordinating committee.

CONSERVATION & LAND USE ADJUSTMENT

To assist the Chief in the development, coordination, and integration of conservation & land use adjustment work for the Bureau & to act as vice-chairman of the permanent Bureau coordinating committee.

GENERAL PLANNING

To assist the Chief in the development, coordination, and integration of general planning work for the Bureau & to act as vice-chairman of the permanent Bureau coordinating committee.

RURAL WELFARE

To assist the Chief in the development, coordination, and integration of rural welfare work for the Bureau & to act as vice-chairman of the permanent Bureau coordinating committee.

AGRICULTURAL OUTLOOK

To assist the Chief in the development, coordination, and integration of the agricultural outlook work for the Bureau & to act as permanent member of the permanent Bureau coordinating committee.

COORDINATING COMMITTEE

RESEARCH AND PLANNING

PROGRAM SURVEYS

To study the factors affecting farmers' reactions to agricultural problems and farm programs by a system of continuous field reporting.

MARKETING & TRANSPORTATION RESEARCH

To study problems of agricultural marketing & transportation of farm products, develop programs to promote greater efficiency in distribution and protect producer and consumer.

LAND ECONOMICS

To conduct economic studies in land and water use and land values and tenure in agriculture including economic analysis for flood control and water facilities programs.

PROGRAM ANALYSIS AND DEVELOPMENT

To contact action programs; to study & assist in developing recommendations for changes or revisions in such programs; and otherwise help in developing a well-rounded agricultural program.

FARM POPULATION AND RURAL WELFARE

To study the human and social aspects of agriculture, make findings available and develop plans and programs for adjustments.

STATISTICAL & HISTORICAL RESEARCH

To apply statistical and historical methods in analysis of economic problems of agriculture and interpret and report on the current situations.

PROGRAM STUDY & DISCUSSION

To study the broad social and economic agricultural policies to promote general understanding, thinking, & participation in their development & administration by leadership training & community discussion programs.

MARKETING PROGRAMS AND COORDINATION

Projected

FARM MANAGEMENT & COSTS

To study the economic utilization of resources in farm production to assist in formulation of farming programs for agricultural areas; & to appraise changes in farming policies and programs.

STATE & LOCAL PLANNING

To guide cooperative agricultural planning by State & local committees consisting of farmers, administrators, & technicians and to develop unified State & local agricultural programs.

AGRICULTURAL FINANCE

To investigate, analyze, and report on the economic finance phases of agricultural programs & problems and make recommendations for agricultural finance programs and policies.

ECONOMIC INFORMATION

To direct the information work both of the research and planning phases of the Bureau, including publications, visual and other.

FIELD

To conduct research on the economics of production, distribution, land utilization, and conservation in their broadest aspects; and in cooperation with interested bureaus and with state and local agencies to formulate coordinated, department-wide plans and programs of action in these areas.

THE BUREAU OF AGRICULTURAL ECONOMICS

The reports and publications of the Bureau of Agricultural Economics reflect the function of the Bureau in the Department. This function is that of central Department agency for planning and for economic and social research.

Always a fact-finding agency, the Bureau assumed in 1938 the additional function of cooperative planning and program formulation. These new duties were substituted for certain regulatory functions transferred at that time to other agencies.

The wide scope of the reports and publications listed herein is attributable to the fact that the Bureau necessarily must deal with nearly everything of agricultural interest. The numerous and complex fields with which the Bureau must now be concerned is emphasized by the cooperative nature of its planning and program formulation work.

On the one hand, it is cooperating very closely with the Extension Services, the Experiment Stations, and the Land-Grant Colleges in the promotion of grass roots planning through committees of farmers, technicians, and administrators at community, county, and state levels.

On the other hand, it is working with the other bureaus in the Department in the cooperative drafting of recommendations for presentation to the Program Board of the Department and to the Secretary. Obviously, nothing of interest to agriculture can be alien to this work.

^{1/} Compiled by Marietta Thomas and Marian R. Sorenson

Likewise, the research work of the Bureau is so shaped as to combine with the planning and program formulation processes into a single activity looking to the welfare of all farmers throughout the country.

As the reports and publications herein mentioned will illustrate, the research of the Bureau has always been pointed toward interpretation and practicable use. The duties of planning and program formulation in recent years have tended to stress this phase of research more than ever, and present unsettled world conditions have made new and heavy demands for effective democratic use of all instruments both of planning and of research.

A primary requisite for the successful functioning of such instruments is an informed public opinion. All of the reports and publications listed herein have been issued as contributions to that end.

SITUATION AND OUTLOOK REPORTS

SITUATION REPORTS

Two general "situation" reports provide information to those who wish to follow the general agricultural situation and the outlook for the important farm products. Together with the more complete situation reports on individual commodities and farm income, they provide a means of keeping up to date on the outlook for farm products and the month to month trend of farm income. The first of the two general reports is designed particularly for farmers, while the second is adapted to the requirements of economists, extension workers, and business men.

The Agricultural Situation - A printed periodical issued about the 10th of each month. Contains very brief summaries of the price and production situations for the more important farm products, and a limited number of tables enabling the reader to keep up to date on the current agricultural situation. Brief articles dealing with current economic problems of agriculture are included. This publication is designed primarily for those who are interested in following the general situation for agriculture from a non-technical standpoint. Free distribution is limited to U. S. Department of Agriculture or State College workers or cooperators, to agricultural libraries, and the press. Others may obtain it from the Superintendent of Documents, Government Printing Office, Washington, D. C., at a subscription price of 50 cents a year (foreign rate 70 cents).

The Demand and Price Situation - A mimeographed monthly review of the factors affecting the domestic and foreign demand for farm products, and of general trends in the prices of farm products, wholesale prices of other products, and farm income. It also contains summaries of the price situation and outlook for the major farm products. This publication, issued about the 15th of each month, provides more detailed and technical analyses than "The Agricultural Situation."

The Farm Income Situation - A monthly processed report issued about the 23rd of each month. It contains estimates of cash farm income from marketings and government payments in the preceding month, with separate estimates of income from the principal groups of commodities. It also contains estimates of income by States from sales of crops, sales of livestock and livestock products, and government payments in the second preceding month. Annual estimates of cash and gross income by States for major farm commodities, and estimates of selected farm expenses are presented from time to time, supplementing the Income Parity reports listed on pages 19 and 20.

Individual Commodity Situation Reports - For each of the more important farm products for which adequate information is available, a mimeographed report is issued periodically, designed to give a rather complete picture of the supply, demand, price and outlook situation for the respective commodities. These situation reports contain information on the outlook for agricultural commodities to aid in planning production and marketing: Tables and charts are included, containing current figures on acreage, yield, production, market movement, stocks, consumption, foreign trade, and prices, and there are comparisons with other significant periods. From time to time, the results of special studies relating to the prices of the respective commodities are included.

Thus, anyone receiving one of the two general situation reports, and the situation report for the commodity of particular interest, is able to keep up to date on the price situation and outlook.

The following commodity situation reports are issued:

Monthly

The Wool Situation	Issued about the	10
The Fats and Oils Situation	Issued about the	14
The Dairy Situation	Issued about the	16
The Livestock Situation	Issued about the	18
The Poultry and Egg Situation	Issued about the	20
The Fruit Situation	Issued about the	21
The Wheat Situation	Issued about the	23
The Feed Situation	Issued about the	26
The Cotton Situation	Issued about the	27
The Vegetable Situation	Issued about the	30

Quarterly

The Tobacco Situation (January, March, July, and September)
The Rice Situation (Issued irregularly, as outlook information becomes available)

Annually

The World Sugar Situation. Issued in May or June.

ANNUAL OUTLOOK INFORMATION

Annual outlook statements appear in the Situation Reports at the time which will help the farmer to prepare his production and marketing plans for the coming year. Shorter-term outlook material is included in the Situation reports from month to month.

In addition to the regular outlook service in the situation reports and the brief summaries appearing in "The Agricultural Situation," special articles on outlook are issued occasionally as the need arises. Two special statements were issued for 1941, entitled "Regional Adjustments to Meet War Impacts" and "The Impact of War and the Defense Program on Agriculture." The annual reports entitled, The Agricultural Outlook (mimeographed) and The Farm Outlook (printed) have been discontinued.

Each year "The Agricultural Situation" devotes an entire issue, usually October, to an annual outlook summary for the coming year.

Charts and maps on subjects covered in the Outlook Statements and Situation reports are issued in the form of bulletins, multilith books, and wall charts. Lists of economic and outlook charts are issued for the use of economic workers and teachers. Photographic prints of charts and maps are for sale at 10 cents each for 8 x 10 $\frac{1}{2}$ " prints; 10 cents for 30 x 40" on blue-print paper (Outlook charts only); 20 cents for 30 x 40" wall charts on black-line paper (Outlook charts only); 75 cents for 30 x 40" wall charts on bromide paper.

Outlook Chart Books - A series of chart books, 8 x 10 $\frac{1}{2}$ " in size, containing maps and charts on each of the principal crops, livestock, oilseeds, farm family living, demand, credit and prices, with data and explanatory legends, is issued annually in the fall.

FEDERAL AND STATE LEGISLATION

Digest of Federal and State Legislation Affecting Rural Land Use is a summary of current legislation, relating to the field of land economics and land planning, introduced and enacted. While emphasis is on land use problems, the bulletin contains digests of important legislation in the general field of agriculture -- marketing, insurance and credit, and rural welfare. Issued semimonthly during State legislative sessions. Annual reports are issued summarizing the outstanding legislation enacted during the year. Distributed free to State and Federal workers and others requesting it.

PRICE SPREADS

Price Spreads Between the Farmer and the Consumer summarizes the total charges for marketing domestic farm food products. The number of retail food items covered is 58. An original report issued in 1936 contained all available material for the period 1913-35. Annual supplements have been issued in February or March of later years, each of which contains all data after 1935 and discusses recent developments. A monthly statistical summary shows prices and price spreads for all foods for which monthly farm prices are collected. Distributed free upon request.

AGRICULTURAL FINANCE REPORTS

Farm Real Estate Taxes - This report on farm real estate taxes, in the form of taxes per acre, indexes of taxes per acre, and taxes per \$100 of real estate value, is issued each year, to cover the levies of the previous calendar year. Each of the three series is issued by States and geographic divisions. The first two series, which until 1938 covered the period from 1913 to date, now cover the period from 1890 to date; and the third series covers the period from 1909 to date. In all States where possible the data represent sample farms for which acreage and tax figures are gathered from local-government officials. In other States corresponding data are obtained from county agricultural agents, or voluntary crop reporters, or from farmers whose names are selected by local officials. For certain States the agricultural experiment stations have furnished the field records. The reports are so weighted as to give estimates covering all farms in all counties, rather than only farms and counties reporting. Issued in mimeographed form and also published in "Agricultural Finance Review." An index of real estate taxes per acre for the United States is published monthly in "The Agricultural Situation."

Farm Mortgage Loans of Leading Lending Agencies - This statistical report shows the amount of outstanding farm-mortgage loans by States held by leading lending agencies at the end of each year. Data are included for the Federal land banks and Land Bank Commissioner, life insurance companies, joint stock land banks, commercial banks and three State credit agencies. Issued semiannually in "Agricultural Finance Review."

Agricultural Loans of Commercial Banks - This report contains data on agricultural loans held by all insured commercial banks, by States, as of December 31 and June 30. Loans are classified into two groups: (1) personal and collateral loans and (2) loans secured by farm real estate. Issued semiannually in "Agricultural Finance Review." Earlier data are contained in Technical Bulletin 521, "Agricultural Loans of Commercial Banks."

Estimated Total Farm Mortgage Debt - These estimates of total farm mortgage debt and number of farms mortgaged, by tenure and by States, are issued for census years. Beginning with 1936, annual estimates of total mortgage debt by States are being compiled. Estimates for intercensal years are based on holdings of leading agencies and upon data relating to mortgages filed and released for other agencies. Issued annually in "Agricultural Finance Review."

Farmer Bankruptcies - A report on bankruptcy data issued annually in mimeographed form. The report for the fiscal year ended June 30, 1940 shows by States the total number of bankruptcy cases filed, the number filed by farmers, and the percentage farmer cases are of the total. Similar data are shown in previous reports except that they are for cases concluded rather than cases filed. Earlier reports also carry figures on the number of bankruptcies concluded in occupational groups other than farmers, information which was not available for the 1940 report. All reports contain an analysis by States of the cases handled under Section 75 of the National Bankruptcy Act. Data for the 1940 report were compiled from reports of the Administrative Office of the United States Courts, whereas those for earlier years are from annual reports of the Attorney General. An historical summary is contained in U.S.D.A. Circular No. 414, "Farmer Bankruptcies, 1898-1935."

County Distributions of Agricultural Loans for Selected Lending Agencies - This new series of reports presents material on agricultural loans in each of the 48 States. Each State report contains State and county figures on farm real estate loans and short-term loans to farmers held by selected lending agencies on specified dates in 1940, and county figures on loans made during 1940 by various Federally sponsored agencies. Agricultural loans held on January 1, 1935 and July 1, 1940 by insured commercial banks are classified by type of security for each county. State data on loans to farmers' cooperative organizations, total farm-mortgage debt, interest rates and charges, cash farm income, farm land values and transfers, and delinquencies and debt adjustment are also included. Issued annually in mimeographed form.

Deposits of Country Banks - A report on indexes of net demand deposits of member banks of the Federal Reserve System, located in places of less than 15,000 population is compiled for three groups of States. One group consists of the 20 leading agricultural States, excluding California. The second group of States includes Alabama, Arkansas, Georgia, Louisiana, Mississippi, North Carolina, Oklahoma, and South Carolina. The third group includes Ohio, Indiana, Illinois, Iowa, Minnesota, Missouri, and Nebraska. The monthly indexes have 1923-4-5 monthly average as the base. Issued semi-annually in "Agricultural Finance Review." Monthly data available in typewritten form. Earlier data are available in Technical Bulletin No. 575, "Demand Deposits of Country Banks."

FARM INCOME REPORTS

Cash Income - Issued annually in January or February, this report gives preliminary estimates of cash income for the preceding calendar year and revisions for earlier years. These estimates and revisions show United States total income from marketings of the principal crops and groups of livestock and livestock products as well as Government payments. It also contains estimates of cash income by States from sales of crops, sales of livestock and livestock products, and Government payments, with comparisons for earlier years. Annual reports are also issued giving revised data for the United States by months for groups of commodities; and by states and by months for total crops and total livestock and livestock products.

Gross Income - This report issued annually about May or June presents estimates for the preceding calendar year of gross income by commodities for the United States and gross income by States from crops, livestock and livestock products, and Government payments.

Farm Returns - Annual summaries of reports of individual farmers, each reporting the financial results of his own farm business for the calendar year. Receipts, expenses and other information for described farms are shown as averages. Results are presented as averages in six geographic divisions, but not by States. Farmers who report have farms larger than the averages shown by the Census of Agriculture, hence are not "average" in the usual sense. Broadly, they reflect the shifting conditions from year to year and from one section of the country to another. Issued in mimeographed form for limited distribution.

COST-OF-PRODUCTION REPORT

Cost-of-Production - A report showing annual estimates of the costs of producing corn, wheat, and oats, in groups of States, and of producing cotton in the principal States and producing areas of the South, based on an annual inquiry as to the details of costs, on area surveys, and on other available information. Costs per acre are shown for eight classes of cost factors and the costs per bushel or per pound are computed. Released in "Crops and Markets."

THE FARM REAL ESTATE SITUATION

The Farm Real Estate Situation is an annual report in the regular Circular series of the Department of Agriculture, issued near the close of the calendar year. It covers the previous real-estate year. It reviews briefly the general situation and discusses values in the separate geographical divisions and States, and items like causes of change in values, change in farm ownership including foreclosures and forced and voluntary sales, farm-mortgage credit and taxes, and other factors bearing upon the farm real estate situation. Free on request.

FARM-POPULATION ESTIMATES

Farm Population - A report containing annual estimates of the number of persons living on farms, the movement from farms to towns and cities and from towns and cities to farms, as well as the number of births and deaths in farm population. These estimates are based on returns from farmers, supplemented by vital statistics and census data. Besides the total figures for the United States there are tables by geographic divisions. Released about June 15 each year in mimeographed form. A summary is printed in "The Agricultural Situation."

PERIODICALS

"AGRICULTURAL ECONOMICS LITERATURE"

Agricultural Economics Literature is prepared by the Library of the Bureau of Agricultural Economics. Its purpose is to aid agricultural economists in keeping abreast of the literature in their various fields with the minimum expenditure of time. It attempts to record the literature relating to agricultural economics which has been received in the library during the previous month. Each issue contains a few reviews of important books made by the specialists in the Bureau and elsewhere. There are descriptive notes and abstracts of other publications, and each issue contains the following regular features: State Publications issued by the State Agricultural Colleges, Departments of Agriculture, Agricultural Experiment Stations and Agricultural Extension Services; U. S. Department of Agriculture Publications, Economic in Character, Including both Printed and Mimeographed Material; a list of Periodical Articles Relating to Agricultural Economics obtained by reading a large number of domestic and foreign periodicals; and a Selected List of Recent Reviews. Lists of new periodicals and of bibliographies in the field of agricultural economics are included from time to time. An author and subject index covering the material included in each volume is made upon its completion, thus providing a useful key to the agricultural economic publications of the previous year. Agricultural Economics Literature appears every month except July and August. It is distributed to officials, Federal and State workers in agricultural economics, economic libraries, and others who cooperate with the Department.

"AGRICULTURAL FINANCE REVIEW"

The Agricultural Finance Review is a semiannual report issued each May and November in processed form. It consists of a review of current developments and research in the field of farm credit, farm insurance, and farm taxation. In addition to short articles on various aspects of these subjects, there is included a bibliography of the literature on agricultural finance and a statistical appendix giving detailed data by States and geographic divisions of loans of leading lending agencies, both long term and short term, data on farm real estate taxes and related information. It is distributed free upon request.

"THE AGRICULTURAL SITUATION IN RELATION TO BANKING"

The Agricultural Situation in Relation to Banking is a new quarterly report issued to provide county bankers and other lending agencies with basic credit and agricultural information that will be adaptable for their use. It contains a review of recent agricultural credit developments; a survey of the agricultural situation; a digest of selected items dealing with the various government programs; and a list of additional available government agricultural reports and services. It is distributed free upon request.

"THE AGRICULTURAL SITUATION"

The Agricultural Situation - A monthly, printed publication. (See Situation and Outlook Reports, page 3.)

"COTTON LITERATURE"

Cotton Literature - Selected References is prepared each month in the Library of the United States Department of Agriculture with the cooperation of the Bureau of Agricultural Economics, the Agricultural Marketing Service, the Bureau of Plant Industry, and the Bureau of Entomology and Plant Quarantine. The purpose of this mimeographed publication is to select from the mass of current literature on cotton those books and articles that are of interest to workers in the Department of Agriculture and to bring them promptly to the attention of these workers. It is distributed to Government officials, libraries, workers in agricultural colleges and experiment stations and other institutions, and individuals who can show a need for it.

"FARM POPULATION AND RURAL LIFE ACTIVITIES"

Farm Population and Rural Life Activities is a processed report issued quarterly for investigators, teachers, and extension workers in the field of rural sociology. It is designed to aid rural social research by bringing to the attention of workers in that field new projects started and the scientific results of projects under way or completed. Distributed to cooperators.

"LAND POLICY REVIEW"

Land Policy Review is a monthly publication devoted to social and economic phases of agriculture, especially as they relate to agricultural planning. It is primarily a journal of opinion. Every month this magazine presents nontechnical discussions, opinions, reports, and criticisms by qualified persons within and outside the Department of Agriculture. It is committed to no particular program or policy--it tries to get and publish background material for the making of policies. Free distribution is limited to workers in the Department and to members of other Federal and State agencies interested in this program and its related fields. Others may obtain it from the Superintendent of Documents, Government Printing Office, Washington, D. C., at a subscription price of \$0.50 a year (foreign rate 75¢).

"CROPS AND MARKETS"

Crops and Markets is a printed monthly publication of the Department of Agriculture. It carries market statistics under these general classes: Livestock, meats, and wool; dairy and poultry products; grain; feed, and seed; and cotton. It contains production statistics including complete and detailed reports of the crop reporting service, prices received by farmers, and intentions-to-plant-and-breed reports, published by the Agricultural Marketing Service, as well as special articles of an economic and statistical nature prepared by the staff of the Bureau of Agricultural Economics. Distribution is limited by Public Resolution 57 to Department employees, staff members of agricultural colleges, cooperators, agricultural libraries, and the press. It can be obtained from the Superintendent of Documents, Government Printing Office at a subscription price of \$1 a year (foreign rate \$1.50).

RADIO SERVICES

National Network Programs - "Farm Business Facts" is the title given to the broadcasts based on situation reports by the Bureau of Agricultural Economics during the Department of Agriculture's portion of the National Farm and Home Hour. Outlook information and data from other economic reports are included in these programs. Periodically, information on the programs of agricultural planning in the States is presented. The National Farm and Home Hour is carried coast to coast daily by 102 N.B.C. radio stations.

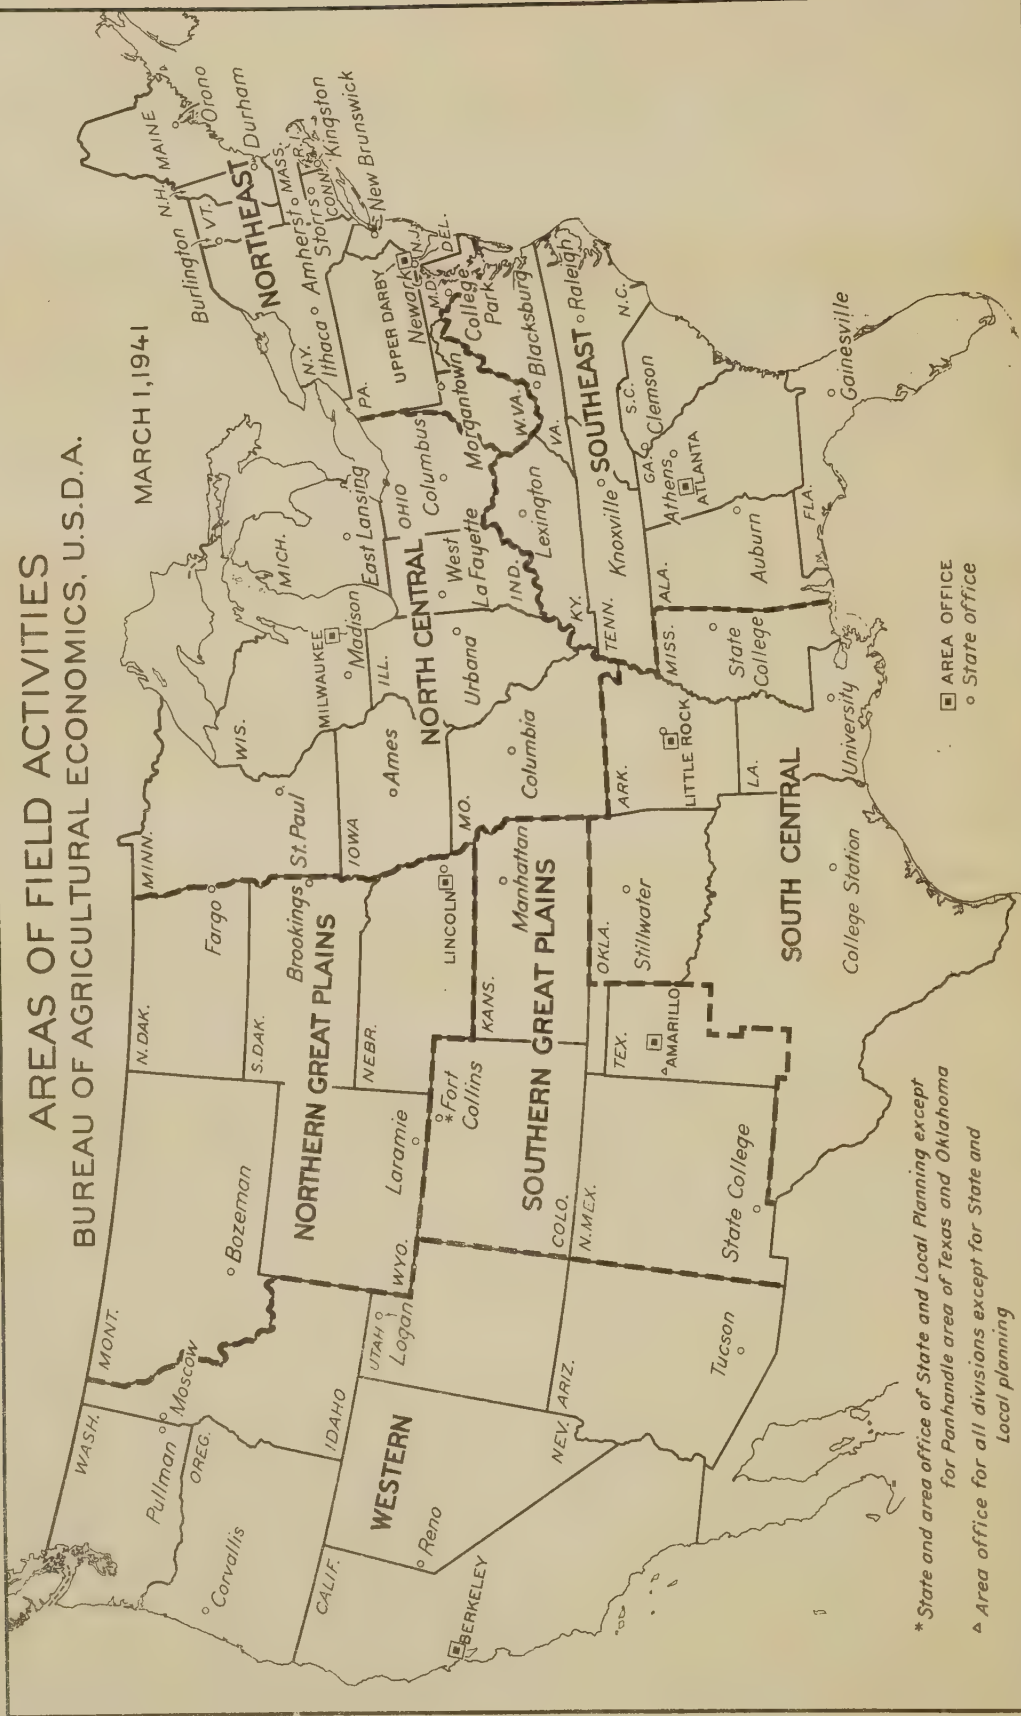

Regional Networks - General economic and agricultural planning information is provided to the Pacific Coast and Rocky Mountain States through "Western Agriculture on the Air" presented by the Department's Radio Service from San Francisco. Eleven stations in seven States carry this daily program. Similar information is sent to New England listeners through programs presented by the Department in cooperation with the six New England State Departments of Agriculture from Boston; the programs are carried direct by 11 radio stations and circularized through 17 additional stations in this area.

Additional economic information is provided by the Radio Service of the Department to listeners of 407 local stations throughout the country. This service is known as "Farm Flashes." The Flashes in most instances are cleared through the State extension services, where they are further localized.

Press associations, through their wire systems, are providing over 700 radio stations with an increasing volume of agricultural economic information originating in the Bureau.

BUREAU OF AGRICULTURAL ECONOMICS*

AGRICULTURAL FINANCE:

- Agricultural Finance in the County Planning Program. Norman J. Wall.
Reprint from Agricultural Finance Review. November 1940.
(Processed).
- Agricultural Loans. (Separate report for each State. See page 7).
1941. (Processed).
- Agricultural Loans of Commercial Banks. Technical Bulletin No. 521.
1936.
- Agricultural Loans of Commercial Banks Show Further Decline. June 1937.
(Processed).
- Austria and Its Agricultural Set-Up Between the World War and the German
Invasion. Address by Oscar Zaglits. July 9, 1940. (Processed).
- Average Rates of Interest Charged on Farm-Mortgage Recordings of Selected
Lender Groups. (Data for United States and geographic divisions,
1910-35, and by States, 1917-35). November 1940. (Processed).
- Average Size of Farm-Mortgage Recordings of Selected Lender Groups.
(Data for United States, geographic divisions, and States, 1917-35)
November 1940. (Processed).
- County Banking in Wisconsin During the Depression. Technical Bulletin
No. 777. 1941.
- Crop Insurance. Yearbook Separate No. 1759. 1940 Yearbook.
- Demand Deposits of Country Banks. Technical Bulletin No. 575. 1937.
- Farm Mortgage Credit. Technical Bulletin No. 288. 1932.
- Farm Security Clients Insure Livestock. R. Austin Griffin. Reprint
from Agricultural Finance Review. May 1940. (Processed).
- Farmer Bankruptcies, 1898-1935. Circular No. 414. 1936.
- Farmer Bankruptcies in 1939 Lowest in 18 Years. March 11, 1940.
(Processed).

* Arranged by broad subjects.

AGRICULTURAL FINANCE (Continued):

- Farm-Mortgage Debt and Farm Investments of Life Insurance Companies.
(Tables and charts presented by Norman J. Wall at the hearings
before the Temporary National Economic Committee, February 14,
1940.) (Processed).
- Farm Real Estate Taxes in 1939. October 1940. (Processed).
- Federal Seed-Loan Financing and its Relation to Agricultural Rehabilita-
tion and Land Use. Technical Bulletin No. 539. 1936.
- Financing Crop Production on the Eastern Shore of Virginia. February
1938. (Processed).
- Fluctuations in Outstanding Farm-Mortgage Debt, 1910-39. Donald C.
Horton. Reprint from Agricultural Finance Review, November 1939.
(Processed).
- Holding Surplus Farm Products with Government Credit. George Y. Jarvis.
Reprint from Agricultural Finance Review, November 1940. (Processed).
- Lender Distribution of Farm-Mortgage Recordings (Data for United States
and geographic divisions, 1910-35, and by States, 1917-35).
November 1940. (Processed).

1937. (Processed).
- Recent Agricultural Credit Developments Relating to Commercial Banks.
February 1937. (Processed).
- Regional Trends of Farm-Mortgage Interest Rates, 1910-39. Reprint from
Agricultural Finance Review. May 1940. (Processed).
- Regional Variations in the Sources and in the Tenure Distribution of
Farm-Mortgage Credit, Outstanding January 1, 1935. February 1938.
(Processed).
- Rural Taxation. Yearbook Separate No. 1760. 1940 Yearbook.
- Supplementary Report on Agricultural Credit Developments Relating to
Commercial Banks. November 1937. (Processed).
- The Causes: Imperfections in Agricultural Finance. Yearbook Separate
No. 1615. 1938 Yearbook.
- The Remedies: Changes in Agricultural Finance. Yearbook Separate No.
1620. 1938 Yearbook.

AGRICULTURAL HISTORY:

An Historical Survey of American Agriculture. Yearbook Separate No. 1783. 1940 Yearbook.

Appendix: A Brief Chronology of American Agricultural History. Yearbook Separate No. 1782. 1940 Yearbook.

Some General Histories of Latin America. Agricultural History Series No. 1. April 1941.

The Farmer's Changing World. Yearbook Separate No. 1728. 1940 Yearbook.

AGRICULTURAL INCOME:

Cash Farm Income and Government Payments in 1940 are Estimated at 9,120 Million Dollars. February 19, 1941. (Processed).

Farm Returns, 1939, with Comparisons. February 1941. (Processed).

Gross Farm Income and Government Payments. May 26, 1941. (Processed).

Gross Farm Income and Indices of Farm Production and Prices in the U. S. 1869-1937. Technical Bulletin No. 703. 1940.

Income Parity for Agriculture

Part I. - Farm Income

Section 1. Income from Cotton and Cottonseed. Calendar Years 1910-37. April 1938. (Processed).

Section 2. Income from Tobacco. Calendar Years 1909-37. May 1938. (Processed).

Section 3. Income from Hogs. Calendar Years 1909-37. July 1938. (Processed).

Section 4. Income from Cattle and Calves. Calendar Years 1909-37. November 1938. (Processed).

Section 5. Income from Wheat. Calendar Years 1910-37. January 1939. (Processed).

Section 6. Income from Sheep and Lambs, Wool and Mohair. Calendar Years 1909-38. March 1939. (Processed).

Section 7. Income from Corn. Calendar Years 1910-38. July 1939. (Processed).

Section 8. Income from Flaxseed. Calendar Years 1910-38. July 1939. (Processed).

Section 9. Income from Oats and Barley. Calendar Years 1910-38. August 1939. (Processed).

Section 10. Income from Rye and Buckwheat. Calendar Years 1910-38. October 1939. (Processed).

Section 11. Income from Potatoes. Calendar Years 1910-38. March 1940. (Processed).

AGRICULTURAL INCOME (Continued):

Income Parity for Agriculture (Continued)

Part I. - Farm Income (Continued)

- Section 12. Income from Chickens and Eggs. Calendar Years 1909-39. January 1940. (Processed).
- Section 13. Income from Sweetpotatoes. Calendar Years 1910-39. October 1940. (Processed).
- Section 14. Income from Truck Crops and Farm Gardens. Calendar Years 1909-40. February 1941. (Processed).
- Section 15. Income from Rice. Calendar Years 1910-40. June 1941. (Processed).

Part II. - Expenses of Agricultural Production.

- Section 1. The Cost of Hired Farm Labor, 1909-39. April 1939. (Processed).
- Section 2. Farmers' Expenditures for Fertilizer and Agricultural Lime. Calendar Years 1909-39. October 1940. (Processed).
- Section 3. Purchases, Depreciation, and Value of Farm Automobiles, Motortrucks, Tractors, and Other Farm Machinery. Calendar Years 1910-39. August 1940. (Processed).
- Section 4. Farmers' Expenditures for Operating Automobiles, Motortrucks, and Tractors. Calendar Years 1910-39. October 1940. (Processed).
- Section 5. Expenditures for and Depreciation of Permanent Improvements on Farms, 1910-40. March 1941. (Processed).

Part III. - Prices Paid by Farmers for Commodities and Services.

- Section 1. Medical Service Rates to Farmers - 1910-14, 1924-29, 1932, and 1935-36. August 1938. (Processed).
- Section 2. Rates for Electricity for Farm Home and Farm Power - 1910-14, 1920, 1924-36. September 1938. (Processed).
- Section 3. Telephone Rates to Farmers in the United States - 1910-14, 1924-29, 1932, and 1935-36. December 1938. (Processed).
- Section 4. Prices Paid by Farmers for Farm Machinery and Motor Vehicles, 1910-38. May 1939. (Processed).

Part V. - Population, Farms and Farmers.

- Section 1. Farm Population, Nonfarm Population, and Number of Farms in the United States, 1910-39. December 1939. (Processed).

Material Bearing on Parity Prices. Presented by Howard R. Tolley at a hearing on parity prices and income for agriculture before a subcommittee of the Committee on Agriculture and Forestry, United States Senate. July 1941. (Processed).

AGRICULTURAL INCOME (Continued):

State Estimates of Cash Farm Income and Government Payments by Months,
January 1936 to December 1939. May 1940. (Processed).

The Changing Composition of Gross Farm Income Since the Civil War, by
Louis H. Bean, September 1940. (Processed).

United States Monthly Estimates of Cash Farm Income and Government
Payments, January 1936 to January 1940. April 1940. (Processed).

AGRICULTURAL OUTLOOK:

Agricultural Outlook Charts, 1941.

Cotton and Tobacco. October 1940. (Processed).

Dairy and Poultry. October 1940. (Processed).

Demand, Credit, and Prices. October 1940. (Processed).

Farm Family Living. October 1940. (Processed).

Feed Grains, Fats and Oils. October 1940. (Processed).

Fruits and Vegetables. October 1940. (Processed).

Livestock - Hogs, Beef Cattle, Sheep. October 1940. (Processed).

Wheat, Rice and Dry Beans. October 1940. (Processed).

Selected Charts for Vocational Teachers. October 1940. (Processed).

Summary statements for demand, income, prices and all commodities.

The Agricultural Situation, October 1940. (Outlook statements also
appear in the Commodity Situation Reports, see page 4).

The Industrial Outlook for Agriculture. Address by Louis H. Bean.
November 16, 1939. (Processed).

The Outlook for Livestock, 1941. November 1940. (Processed).

AGRICULTURAL STATISTICS AND METHODOLOGY:

Agricultural Imports Classified on the Basis of their Competitive Nature
and Tariff Status. June 1937. (Processed).

Agricultural Production in 1939 was 3 percent Higher than in 1938.
July 10, 1940. (Processed).

A Guide to Collecting, Describing, and Summarizing Price Data. August
1940. (Processed).

An Analysis of the Effects of the Processing Taxes Levied Under the
AAA. 1937.

Approximate or Average Weights of Various Commodities and Other Conversion
Factors. SAS 40. Separate from Agricultural Statistics, 1940.

AGRICULTURAL STATISTICS AND METHODOLOGY (Continued):

A Study of Factors Affecting the Price of Dry Edible Beans in the United States, by Classes, 1922-23 to 1934-35. February 1938. (Processed).

Consumption of Agricultural Products. March 1941. (Processed).

Dairy and Poultry Statistics. SAS 46. Separate from Agricultural Statistics. 1940.

Factors Affecting the Price of Cotton. Technical Bulletin No. 50. 1928.

Factors Affecting the Price of Hogs. Department Bulletin No. 1440. 1926.

Factors Affecting the Price of Rice. Technical Bulletin No. 297. 1932.

Farm Business and Related Statistics. SAS 48. Separate from Agricultural Statistics, 1940.

Fats, Oils, and Oleaginous Raw Materials - Production, Prices, Trade, Disappearance in the United States, 1912-35 and Available Data for Earlier Years. Statistical Bulletin No. 59. 1937.

Flaxseed Prices and the Tariff. Document No. 62. Senate, 76th Congress, 1st Session. April 1939.

Foreign Trade of the United States in Agricultural Products. SAS 47. Separate from Agricultural Statistics, 1940.

Miscellaneous Agricultural Statistics. SAS 49. Separate from Agricultural Statistics, 1940.

Oleomargarine - Statistics of Production, Materials used in Manufacture, Consumption, Trade, and Prices. August 1936. (Processed).

Production and Consumption of Manufactured Dairy Products. Technical Bulletin No. 722. 1940.

Soybeans in the United States; Recent Trends and Present Economic Status. Technical Bulletin No. 619. 1938.

State and Federal Legislation and Decisions Relating to Oleomargarine. Brief Summary. Revised January 1939. (Processed).

Statistics of Beef Cattle, Hogs, Sheep, Horses, and Mules. SAS 45. Separate from Agricultural Statistics, 1940.

AGRICULTURAL STATISTICS AND METHODOLOGY (Continued):

- Statistics of Cotton, Sugar, and Tobacco. SAS 42. Separate from Agricultural Statistics, 1940.
- Statistics of Fruits, Vegetables, and Tree Nuts. SAS 43. Separate from Agricultural Statistics, 1940.
- Statistics of Grains. SAS 41. Separate from Agricultural Statistics, 1940.
- Statistics of Miscellaneous Crops. SAS 44. Separate from Agricultural Statistics, 1940.
- Statistics on Cotton and Related Data. December 1939. (Processed).
- Tariff Rates on Principal Agricultural Products. (Revised). July 1941. (Processed).
- The Preparation of Statistical Tables. A Handbook. December 1937. (Processed).
- The Tariff on Long-Staple Cotton and its Effects. July 1938. (Processed).
- Trends in Production and Foreign Trade for Meats and Livestock in the United States. Technical Bulletin No. 764. 1941.
- World Acreage and Production of Tobacco by Countries (Historical Series). August 1938. (Processed).
- World Production and International Trade in Butter and Cheese. May 1939. (Processed).
- Wholesale Prices of Fats and Oils in the United States: Index Numbers, 1910-39. Technical Bulletin No. 737. 1940.
